

Rārangi Hiahia

Māori Social Sector
Needs Assessment
2021 - 2022

Irene Walker
Māori Engagement Advisor

Kōrero Timatanga - Introduction

The Māori Needs Assessment was developed to engage the Māori Social Sector to provide the work of engagement and deliverables for its sector. It provided an opportunity to seek direction from a wider inclusion of the Māori Social Sector and focus on the needs of the sector.

Tikanga - Methodology

Despite the limitation of COVID and preferred tikanga practises, we attempted to engage with our respective entities via online - survey monkey, pānui, phone and one on one interviews. This was conducted during November '21 - January '22, during Xmas & New Year, one of our busiest times.

Whakarāpoto - Summary

He iti he pounamu, although a small number responded, it was the quality of those who participated and their valuable input given. The results provided the need to work with our smaller entities to grow their capabilities and capacity through training and advocacy work with the highest response to funding accessibility and support. This has set the direction for Socialink!

Key Findings

Raranga Hiahia - Maori Social Sector Needs Assessment Survey

Unfortunately
30% didnt know
Socialink but this
gives us an
opportunity to
bring them into
the Rōpū

26
